About

The unisex brand, Yoko Sakamoto, was launched in 2016.

The designer emphasizes to bring the nature of the material to life in her clothing. She values actual wearing comfort while focussing on craftsmanship and manual procedures for designs, which result in her distinctive and unique style.

The brand's aim is to develop clothing one would always want to wear.

Yoko Sakamoto believes that by creating designs by not interfering with the natural properties of the materials, the best and uniqueness of what they originally have to offer is revealed.

The brand hopes to pass on and to communicate the skills of the Japanese craftsmen involved in their work in a better way, and that this will lead to the creation of products that will enrich the wearer's life and be one of their favourite items for a long time to come.
