TURBO

Is a collision between speed, materialism, and urban subcultures, where trash aesthetics and oversized street codes meet the sharp architecture of high fashion. Inspired by racing culture and the hyper-accelerated world we inhabit, the collection explores simulation, excess, and identity through bold contrasts: T-shirts and balaclavas against sculpted tailoring, synthetic textures clashing with luxury finishes. It is not a critique but a mirror—fashion as velocity, dressed for impact, built for a fast world that refuses to slow down.
